Lesson 7 Literacy: non-fiction

4

1 Look at the information panel again and write the numbers.

- a basic facts about the animal
- b the animal’s habitat
- c the name of the park
- d information about the animal
- e the information panel title
- f a photo of the animal

1 Animal World Conservation Centre

2 Basic facts

3 Australia

Habitat:

Koalas live in eucalyptus trees in the east of Australia. They eat the leaves on the trees. They eat about 1 kilogram of leaves every day!

Koalas don't drink lots of water. They use the water in the leaves.

Height: 60-85 centimetres

Weight: about 14 kilograms

Population: about 800,000

4

5 Baby koalas are very small. They weigh about 50 grams. A baby koala is called a 'joey'.

6

Koalas are grey and they have got strong claws. They use their claws to climb trees.

2 **Think** Choose and research an animal. Answer the questions for your information panel.

- What’s the animal’s habitat?
- What do they eat and drink?
- What body parts have they got?
- What are the babies like?

3 **Be creative** Look at your notes from Activity 2. Write your information panel.

They live / eat / drink ... They're ... They have / haven't got ...
