KOALA FACTS

Australia

Habitat:

Koalas live in eucalyptus trees in the east of Australia. They eat the leaves on the trees. They eat about 1 kilogram of leaves every day!

Koalas don't drink lots of water. They use the water in the leaves.

Basic facts

Height:
60–85 centimetres

Weight: about 14 kilograms

Population:
about 800,000

OK Extinct

Baby koalas are very small. They weigh about 50 grams. A baby koala is called a 'joey'.

Koalas are grey and they've got strong claws. They use their claws to climb trees.
