

CUADRADO

$$A = l^2$$

$$P = 4l$$

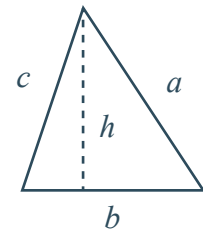

RECTÁNGULO

$$A = b \cdot a$$

$$P = 2(a + b)$$

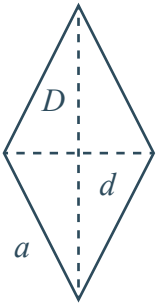

TRIÁNGULO

$$A = \frac{b \cdot h}{2}$$

$$P = a + b + c$$

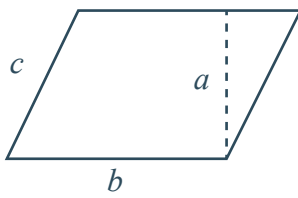

ROMBO

$$A = \frac{D \cdot d}{2}$$

$$P = 4a$$

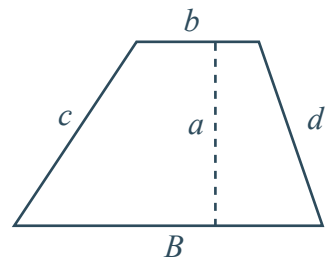

ROMBOIDE

$$A = b \cdot a$$

$$P = 2(b + c)$$

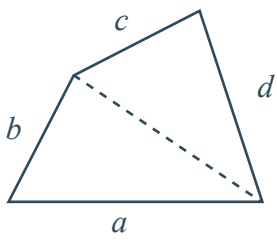

TRAPECIO

$$A = \frac{B + b}{2} \cdot a$$

$$P = B + c + d + b$$

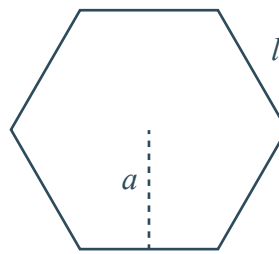

TRAPEZOIDE

A = Suma de las áreas de los 2 triángulos.

$$P = a + b + c + d$$

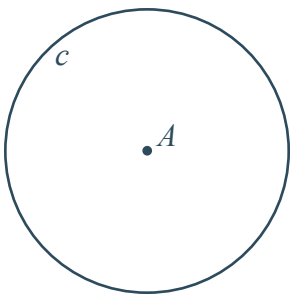

POLÍGONO REGULAR

$$A = \frac{P \cdot a}{2}$$

$$P = n \cdot l$$

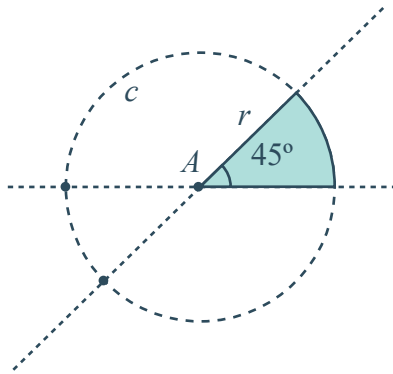

CÍRCULO

$$A = \pi \cdot r^2$$

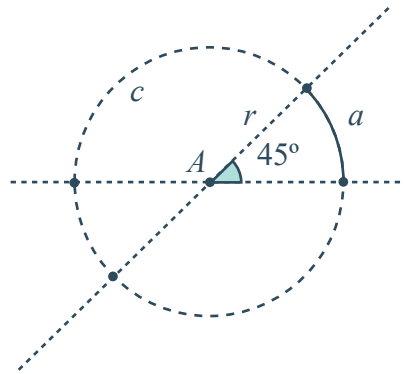

$$L = 2 \cdot \pi \cdot r$$

SECTOR CIRCULAR

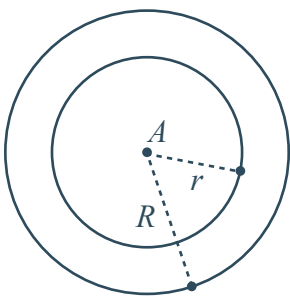

$$A = \frac{\pi \cdot r^2 \cdot \alpha}{360^\circ}$$

ARCO CIRCULAR

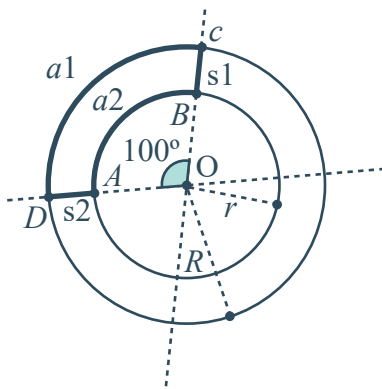

$$L = \frac{2 \cdot \pi \cdot r \cdot \alpha}{360^\circ}$$

CORONA CIRCULAR

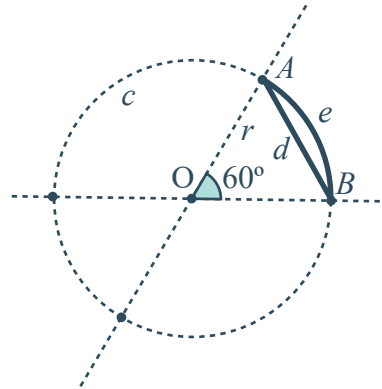

$$A = \pi \cdot (R^2 - r^2)$$

TRAPECIO CIRCULAR

$$A = \frac{\pi \cdot (R^2 - r^2) \cdot \alpha}{360^\circ}$$

SEGMENTO CIRCULAR

$$A = \frac{\pi \cdot r^2 \cdot \alpha}{360} - A_{TRI}$$

Área del segmento circular AOB menos el área del triángulo AOB
