

HOW TO END WITH GENDER VIOLENCE

Nowadays many women of all countries suffer gender violence. Do you think that there is any way to prevent it? In my opinion, there are some things to reduce this abuse against women.

Firstly, the police can give some lectures to children and teens so that they can learn to appreciate a female. Besides, this can prevent the gender violence among the young too. In addition, when a child who has gone to the talk and he sees that a friend or his mother is suffering gender violence, he can tell her what he has learned in the lecture.

Secondly, more associations which deal with gender violence can be created by them. In addition, these can put banners or papers which say that the woman is nobody's owner in cities. Furthermore, men should learn that a woman is never going to belong to them. Moreover, women can demonstrate to reclaim what they are worth.

In conclusion, in my opinion, doing talks and creating more associations against gender violence can help to reduce it. If you meet a woman who is suffering gender violence you can report it.
