

HOW TO END WITH GENDER VIOLENCE

Nowadays it is sad to hear that more than 50 women are killed by their boyfriend, ex boyfriend or husband. In my opinion, that is so dangerous because every time the amount of women increases. Besides, you can see the gender violence on young people and we have to stop this. But how, you may be wondering.

Firstly, you have to realize that the gender violence exists and is very dangerous and we have to stop it. Then, the education or raising awareness of your friends, family and your whole social environment comes. In addition, we have to face up those stupid men and women that say that gender violence doesn't exist or gender violence isn't dangerous for the society. Moreover, it is so important that you have those ideas internalized to help other people to clear out their ideas and move along in society.

Secondly, we have to believe when a woman tells us that her couple or ex-partner is humiliating, being aggressive with her, battering or abusing her. That's very important because if we don't help her, it is as if we are helping the batterer to end with her. Furthermore, we have to support her saying that we are stronger than her batterer, that she has to stay strong until the end of the situation, to be hopeful about the situation and to never ever give up. At last, we have to show her that we will be supporting her on the situation until the end and also tell it to her because it will help her be positive and hopeful.

To sum up, women have to fight until we are in balance with all the advantages that the men have and we do not have. I strongly think that despite of the fact that you are a man or a woman, we all should be feminist.
