

THE GREAT ROBBERY

In May 1984 the most important robbery in history took place, starring Zara Jenner, who came up with the ingenious idea of stealing one of Australia's largest Banks, the National Australia Bank. The theft was caused by the Sydney sewer system.

First, Zara recruited twenty people who had great skills, from an expert in jewellery to an specialist in the construction of tunnels. Furthermore, she had to make plans for a year. Then she went underground with her gang and for two months they were building a tunnel in the sewers of the city, to access the safe of the bank. When they finally arrived, they still had to go through a thick wall. They opened the hole by hand and accessed inside.

The thieves took all the time necessary to rob the bank, in total they managed to take more than one hundred million dollars which they put in plastic bags to transport them in rafts by the sewer water. The first to realize that there was a lack of money were the employees of the bank, who called the police. But Zara was a very intelligent woman and planned the theft in such a precise way that she didn't leave a single clue to the police.

The key to solving the crime was Zara's jealous ex-boyfriend, who before the robbery had called the police to check Zara' suspicious activities. If the ex-boyfriend hadn't given her away, the police wouldn't have arrested her. But Zara's band mates said that she wasn't any thief so the day of her trial she jumped out of the window of the courthouse and landed on a motorcycle that was below. She started the motorcycle and ran away. Never was heard of her or her money.

THE MAGIC ROBBER

This story starts in May, 2017 with a man, Bob, who had lost his job. Bob used to live in a small house in the USA with his parents but they said to him that he couldn't live with them if he didn't help with the house so he decided to do magic tricks in the street to earn some money.

Unfortunately, the money wasn't enough and he started to steal wallets and watches while he was performing. Bob didn't want to steal all his life so he decided to rob a bank and never steal again. Bob didn't want to use guns to intimidate and that's why he was going to rob with the magic.

When Bob entered the bank he asked the secretary to be shown the private lockers that were next to the safe and the manager's office. Bob took the prints of the door from the manager's office and opened the safe. When Bob put all the money in the bag, he couldn't get away through the door since they would see him leaving but he had prepared a plan before robbing.

Bob played a whistle and a lot of pigeons appeared and formed a tremendous scandal. Bob left so fast that when the police arrived, he had already left. Nowadays he is probably enjoying life or giving magic lessons, who knows?

THE MOST INCREDIBLE CRIME

The last hour has confirmed the arrest of six people involved in the Mask case. The Mask case is a group of drug traffickers who underwent plastic surgeries to hide their identity. They were discovered thanks to a homeless person in a timely manner.

Six months ago, the police began to investigate six ex-convicts who had spent large amounts of money going to an aesthetic surgery clinic. A short time later the whole plot of drug trafficking was discovered by the police but due to the aesthetic changes, drug traffickers were impossible to find.

After two exhausting months of searching, the police received information about a pen-drive that contained photos of the operated faces of the drug traffickers. Despite the revealed information the police couldn't find the pen-drive, so the investigation was stopped until a couple of days ago, when a homeless person came to the police station with a pen-drive. He thought that it would be important after seeing how it fell down from one of the two men who caused a shootout on Atlantic Avenue.

Finally, the police managed to stop the six involved in just eight hours. Sheriff Arthur said today at the press conference that if the homeless person hadn't discovered the pen-drive the investigation wouldn't have been completed successfully.
